### ABOUT ME

Results-driven Full Stack Developer specializing in **Laravel** and **React**, with hands-on experience building scalable web applications, **RESTful APIs**, and responsive interfaces. Passionate about transforming ideas into production-ready solutions and committed to continuous growth through emerging technologies.

### PROJECTS

#### Restaurant Management System 04/2026 – 05/2026

- Built complete web-based restaurant management system with multi-user roles (Admin, Employee, Client).
- Implemented **N-Tiers architecture** with Service Layer pattern and role-based access control using Spatie.
- Created responsive UI with Tailwind CSS and Alpine.js, integrated Eloquent ORM for data management.

**Stack : Laravel | PHP | MySQL | Tailwind CSS | Alpine.js | Spatie | Eloquent ORM**

#### Modern Business Website 03/2026 – 04/2026

- Built reusable React components using props and state
- Implemented basic UI layout with responsive design
- Handled user interactions using event handlers
- Managed component state using useState hook

**Stack : React | JavaScript | npm | React Hot-Toast | Motion | Tailwind | Preline UI**

#### Personal Portfolio Website

- Built responsive components using TypeScript for type-safe React development
- Implemented interactive UI with event handlers and state management hooks

**Stack : TypeScript | React | React-bit | Vite | Tailwind CSS**
