About Me

Motivated Full Stack Web Developer with a strong focus on building modern and scalable web applications using **Laravel** and **React**.
I have experience in developing RESTful APIs, managing databases and creating responsive user interfaces. I enjoy turning ideas into real-world projects and continuously improving my skills through practice and learning new technologies. My goal is to grow as a professional full-stack developer and work on impactful and innovative web solutions.

Projects

AI Agency

- Built reusable React components using props and state
- Implemented basic UI layout with responsive design
- Handled user interactions using event handlers
- Managed component state using useState hook
- **Stack : React / JavaScript / Vite / npm / React / Hot-Toast / Motion / Tailwindcss / Preline UI**

Restaurant Website Management

- User authentication and registration system
- Role-based access control using **Spatie** Permission
- Admin dashboard for managing restaurant data
- Menu and order management system
- Interactive UI components using **Alpine.js** and **laravel**
